Custom Projects and Services

Anything goes here, but custom projects need to be at least \$1,000 for us to package. Hourly tracking with a \$300 minimum retainer is available. To find out how much it will cost and how long to complete your customer project, just post a project with a description of what you need and we'll let you know ASAP.

Payment and Delivery

We prefer 100% upfront so there are no delays between tasks, but we require a minimum of 50% for all design and development projects.

We will design your website based on your input in your profile in our project management system. So when you're added into the ACP, you should definitely add/update your profile right away. Once a demo site is provided and approved by you, an additional 25% is required to continue development or changes. Before the site is transferred or delivered, the remaining 25% will be required.

It normally takes about 2-3 weeks to complete a website. It may take longer if it is a development project or more labor intensive with content transfer or graphics creation. Also, we can only move as fast as our clients respond to us with feedback when requested. So please be sure to respond at your earliest convenience.

There will be 4 design drafts:

1. Draft 1 is based on what you described in your profile.
2. Draft 2 is based on your feedback and requests.
3. Draft 3 is the last-minute, last-chance to tell us anything missed or wanted.
4. Draft 4 is the final draft. After that, Whatever Hours are applied for any additional work. And if that is exceeded, we will charge an hourly rate as clearly stated in our terms.

Once the website is completed, approved and verified by a manager, any remaining payments must be paid before the website is transferred to your live domain. Our team will fix any issues if any occur after transfer, but we are not responsible for non-compatible servers.

ALL marketing services must be paid in full before work is commenced.
